Vega Cloud's Enterprise FinOps intelligence platform yields 15%-25% cloud savings —on average

Vega Cloud is an Enterprise FinOps SaaS platform that enables businesses consuming cloud infrastructure at scale to effectively monitor, manage, and optimize their cloud expenses across multi-cloud IT environments. The Vega Cloud platform provides accurate and on-demand visibility into cloud costs with tailored and actionable recommendations that quickly reduce waste and save money.

WHAT MAKES VEGA CLOUD DIFFERENT?

Vega Cloud goes beyond just providing a software solution. Vega's white-glove service provides valuable insights and context from its team of FinOps practitioners and cloud experts to create alignment between Vega's recommendations and your business's unique needs.

Additionally, Vega's **curated ingested data** ensures the accuracy of the data being used, enabling your team to make informed decisions based on trustworthy insights.

VEGA CLOUD REMOVES BARRIERS TO EXECUTION AND CREATES SAVINGS IN DAYS

The Vega Cloud platform is designed to help businesses achieve financial efficiency and cost optimization by providing actionable insights into cloud expenses. With a user-friendly dashboard, in-depth reports, and powerful analytics tools, your team can easily identify cost-saving opportunities and allocate resources effectively.

"Managing complexity well is a major gap in the industry. Vega addresses this better than the other COTS that we've looked at."
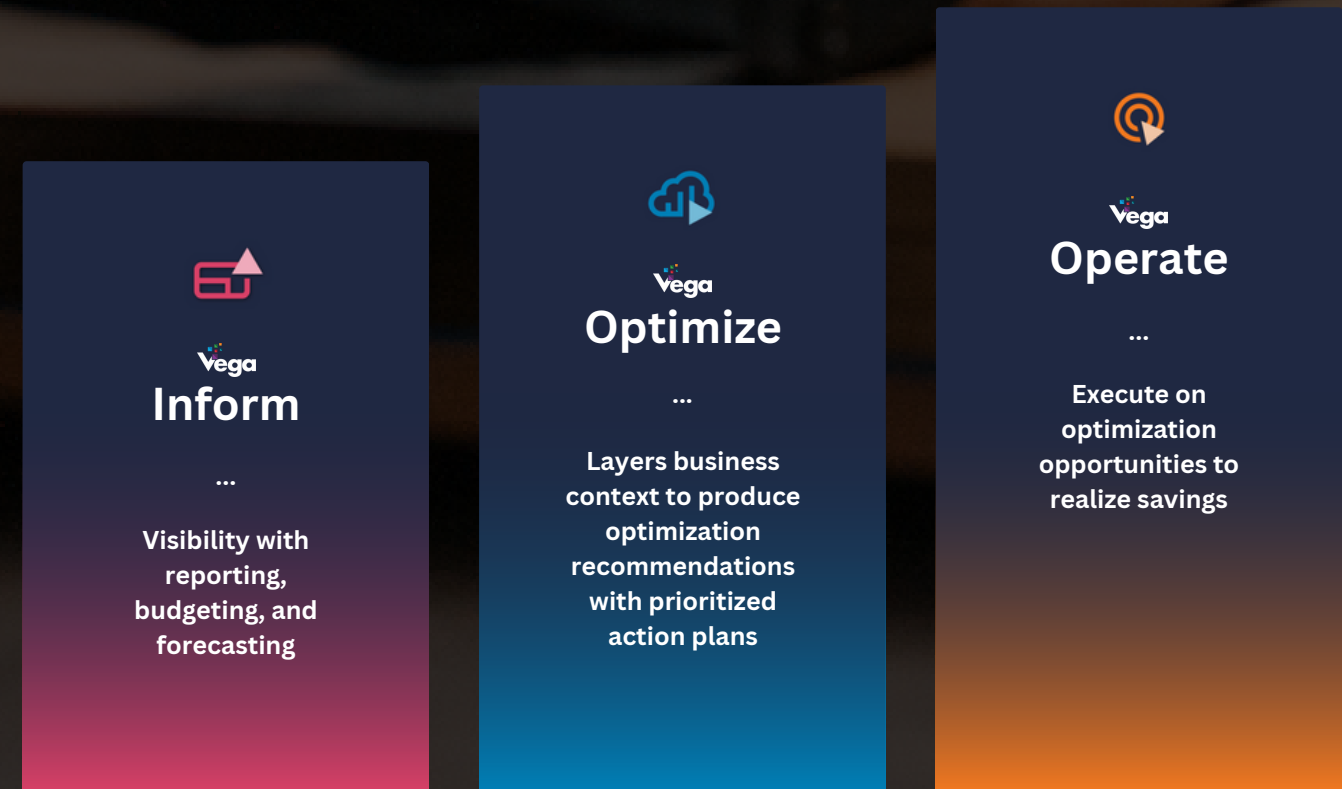

– Sr IT Executive
